MARYLAND STATISTICAL ABSTRACT 1986-87

ACKNOWLEDGMENTS

The Maryland Statistical Abstract is published every other year by the Maryland Department of Economic & Community Development. The 1986-87 edition was supervised by IRENE TASHLICK. DANIEL KOWALSKI, EVE REITZ, and REBECCA SMITH provided valuable services in collecting and organizing data. WENDY STEWARD was responsible for clerical operations, and she was assisted by MIRIAM BUTLER.

We thank the many contributors to this volume. Notes below each table credit its sources. Wherever private sector sources are indicated, permission to use such material should be obtained from the cited source.

The Honorable Harry Hughes
Governor of Maryland
State House
Annapolis, Maryland 21404

Dear Governor Hughes:

I am pleased to submit to you the 1986-87 edition of the Maryland Statistical Abstract. This Department prepares and publishes this document as part of its continuing effort to maintain, on as current a basis as possible, a comprehensive data base on which sound decisions can be made to enhance the well-being and quality of life for all Maryland residents.

This publication provides a statistical record of all aspects of the State of Maryland. We have in one reference source information on residents of Maryland, trends and changes in population, incomes and employment in the Maryland economy, government receipts and expenditures, agriculture, natural resources, politics, and other facets of Maryland living. We also include comparable summary data for other states in the introductory section of this publication, again to facilitate comparisons of relative change and provide a perspective for Maryland.

Great care has been taken to ensure the usefulness and accuracy of this publication. Various local, state and federal agencies cooperated with this Department by providing data unique to their operations. As with previous editions, this report has benefited from suggestions and comments from interested users. We anticipate continuation of such support as we commence our research and statistical efforts for the next edition of the Maryland Statistical Abstract.

Sincerely,

Thomas H. Maddux

STATE RANKINGS: SOURCE NOTES CONT'D.

1984 Civilian Labor Force(1):	U.S. Department of Labor, Bureau of Labor Statistics, Employment and Earnings, May 1985. (1)State figures will not add to the U.S. total shown (obtained from the national data series) because the State estimates are arrived at independently. (2)In cases of ties in rates, States were ranked alphabetically.
1984 Unemployment Rates(2)	
1984 Total Nonagricultural Payroll Employment(1)	
1984 Average Weekly Earnings in Manufacturing	
1982 Value Added by Manufactures:	U.S. Department of Commerce, Bureau of the Census, 1982 Census of Manufactures. State figures will not add to the U.S. total because the U.S. figure reflects revisions to the industry data. Final revisions for the U.S. and the states are not yet available.
1983 Farm Marketing Receipts:	U.S. Department of Commerce, Bureau of the Census, Statistical Abstract of the United States, 1985 edition.
1981 Active Non-Federal Physicians Per 100,000 Population:	U.S. Department of Commerce, Bureau of the Census, Statistical Abstract of the United States, 1985 edition.

*Figures reflect corrections to the census counts made subsequent to the release of the official figures. Revisions are not available by race.

Note: Differences between 1980 and 1970 Census counts by race seriously affect the comparability for "White" and "Other" populations. A much larger proportion of the Spanish origin population in 1980 than in 1970 reported their race as "Other". Also, in 1970, most persons who marked the "Other" category and wrote in Mexican, Venezuelan, Latino, etc. were reclassified as "White". In 1980, these persons remained in the "Other" category. (Appendix B note in Final Report PC 80-1-B22 MD).

NO. 100 contd.

TRADE ACTIVITY IN MARYLAND, ESTABLISHMENTS WITH PAYROLL: 1982 (FOOTNOTES AND SOURCE NOTE)

(1) Each kind-of-business classification includes leased departments classified in that kind of business as if they were separate establishments. Accordingly, data for leased departments are not consolidated with kind-of-business data for main stores in which they are located. Data for 1977 adjusted for comparable treatment of leased departments between 1977 and 1982.

(2) Department stores data includes sales from catalog order desks.

(3) Includes liquor; antique and second hand; sporting goods and bicycle; jewelry; fuel and ice; florists; cigar and other retail stores not elsewhere classified.

(4) Includes mail order houses; automotive merchandising machine operators; and direct selling establishments excluding nonemployer direct sellers.

(5) Includes scrap and waste materials; jewelry, watches, diamonds and other stones, durable goods n.e.c.

(6) Includes farm supplies, tobacco and tobacco products; paints, varnishes; other nondurable goods n.e.c.

(D) Data withheld--disclosure problem. Some service industries covered in the 1977 Census were not covered for 1982 (hospitals; elementary and secondary schools; colleges; labor unions; and political organizations). When the adjustment was made to make the 1977 data comparable with the 1982 coverage, it was necessary to carry out a major suppression of data. The percent change in total receipts from 1977 to 1982 falls in the range of 105-110 percent.

(D)Data withheld--disclosure problem. Some service industries covered in the 1977 Census were not covered for 1982 (hospitals; elementary and secondary schools; colleges; labor unions; and political organizations). When the adjustment was made to make the 1977 data comparable with the 1982 coverage, it was necessary to carry out a major suppression of data. The percent change in total receipts from 1977 to 1982 falls in the range of 105-110 percent.

(2) For week including March 12.

(3) Data at the State level for 1977 has been adjusted to allow for comparability with the 1982 data. For the 1982 report there has been a change in the concept of leased departments--each leased department has been treated as a separate establishment and classified according to that kind of business it conducted. In 1977 and prior Census, data for leased departments were consolidated with the data for stores in which they were located. THE DATA SHOWN BY SUBDIVISION HAVE NOT BEEN ADJUSTED AND ARE NOT COMPARABLE WITH THE 1982 DATA.

Note on the Poverty Level:

The poverty level is a designation used by the federal government as one means of identifying areas and persons with income levels so low that some economic hardship is likely to be present. Various levels have been determined depending on family size, number of children, and age of the family householder or unrelated individual. The poverty thresholds used in the 1980 census differ slightly from those used in the 1970 census, which took into account the same three factors as well as sex of the family householder or unrelated individual and farm-nonfarm residence. In addition, for the 1980 census the thresholds by size of family were extended from 7 or more persons to 9 or more persons. The income cutoffs are updated each year to reflect the change in the Consumer Price Index. The poverty threshold for a family of four was $7,412 in 1979.
